PRODUCT INFORMATION SHEET

HALL CLIPS

Recommended by the Lead Sheet Advisory Service (LSAS)

- Quicker and easier to install than traditional lead wedges.
- Standard Hall Clips suit chases from 6mm to 18mm.
- Hall Clips Plus suit chases from 16mm to 26mm.
- No cutting or folding required.
- No special tools required.

Hall Clips were the concept of a working roofer, designed to save time and money during the installation of lead flashings.

The Hall Clip firmly grips lead in place and is installed literally in seconds without the use of any ‘special’ tools.

Hall Clips come supplied in bags of approximately 50 clips which are small enough, and light enough, to easily fit in a toolbox or pocket and will secure any flashings in a chase from 6mm to 18mm.

Hall Clips Plus come supplied in bags of approximately 25 clips and will secure any flashings in a chase from 16mm to 18mm.

Fixed the same as the traditional lead wedge, it fastens flashings up to 20 times faster.

PRODUCT INFORMATION SHEET

- The Hall Clip grips firmly in place in seconds so lead can be dressed easily before being finally pointed in with Flashpoint for a clean professional finish.
- For best results, insert Hall Clips with the 'H' uppermost.
- Hall Clips can be pushed into the chase securely with a screwdriver or flat bluster chisel.

LOT SIZES

Standard Hall Clips:

50 clips per bag - fixes up to 20 linear metres of flashing.

Hall Clips Plus:

25 clips per bag - fixes up to 10 linear metres of flashing.

HEALTH & SAFETY ADVICE

- Hall Clips may be handled without special precuations.
- When working with lead, follow standard health and safety procedures as laid out in Control of Lead at Work Regulations 2002. Always wash hands well before eating, drinking or smoking.
- Remove metal residues from skin after working with metal by washing with soap and bodywash.
